\$120,000 - \$169,999 • Full time

Posted 9d ago

We are an industry leader experiencing substantial year on year growth with a creative, flexible team that has a small company mentality very much still in play.

We create fast, reliable services and great experiences for our customers.

Working out of our Southbank offices you'll work on building a new cloud service from the ground up.

This role will see a hands-on technical individual with approximately 3+ years demonstrated front end experience to work collaboratively within the technical team.

Working within a greenfields project within a small team you will be able to deliver highly level readable and maintainable code, help make key architectural decisions and help move our platform forward.

What you will need?

- Hands on experience in React.js, Webpack, and Redux.
- In-depth knowledge of JavaScript, CSS, HTML and front-end frameworks.
- Strong web application design and development experience.
- Experience with any backend language and databases.
- Understanding of web service technologies such as HTTP, and REST.
- (Optional) Familiarity with designing front-end applications with live or on-demand video streaming will help but not mandatory.
- A huge willingness to learn and work collaboratively on modern technologies.

What you will be doing?

- Working primarily with React.js and other front-end frameworks.
- Creating feature rich UI and integration with backend apis.
- Monitoring and improving front-end performance.

- Solve complex technical problems through your own decision making and collaboratively with the team.
- Deliver high quality code with documentation and automated tests.
- Support team with solutions design, architecture review, code reviews.
- Support development of backend apis

This exciting role will suit an enthusiastic, team orientated individual who has a thirst for knowledge and wants to work as part of a world class engineering team on industry leading products
